down time for your systems in
the event of an emergency

CORE EXPERTISE

Our core business focuses on supply, Installation, Testing, Commissioning and Maintenance for complete fire system solutions. Our highly trained technician and engineers for firefighting products ranging from basic fire extinguishers to highly sophisticated fire protection system. Company's operations are provided throughout Oman and a wide base of protection is surrounded in all prestigious development sectors in Muscat.

Supply

We have decades of experience in working with Fire Alarm System equipment. We have an in-house dedicated team of engineers familiar with many of the world's leading manufacturers.

Installation

We have working relationships with our local AHJ's, this ensures a smooth installation and sign off to get you open and ready for business. Technicians are manufacturer trained and certified.

Testing

Once Summit Fire system completes the Testing, we send you a copy of the entire fire alarm inspection report, which can accommodate Civil defence requirements.

Commissioning

Our highly skilled engineering team make sure the procedure, tools, application and safety correctly for commissioning in the innovating areas of fire protection to get the better of most critical situations. They have excellent knowledge in the specification system's fire alarm control Panel, initiating and notification devices, manual pull stations, and detectors. We will strive to communicate our progress openly and consistently.

Maintenance

The dedicated Service & Maintenance Division at Hemaya have the capability to provide you with a nationwide service & maintenance package with the necessary equipments and tools for maintenance of fire protection equipments & Fire alarm.

FIRE ALARM SYSTEM

we have expertise
with coded panels,
conventional panels,
addressable panels,
and multiplex
systems.

Fire detection & alarm system

Al Hemaya is an independent fire alarm specialist in the product supply, installation, commissioning and maintenance of a comprehensive range of fire detection systems. We offer a service relating to fire alarms throughout the Oman.

Our technicians undertake commissioning service of all major brands. Our expertise ensures that we are able to offer a full package from a small single zone system that could provide protection to a small single floor office to large multi-loop networked systems that could provide protection to shopping malls, hotels or manufacturing plants.

FIRE FIGHTING

We integrate our works
and fully comply with the
requirements of
authorities.

Fire fighting system

We protect our customers, enabling them to establish the right fire protection system that can combat their fire risks effectively. We specialize in the supply, design, installation, commissioning and maintenance of fire sprinklers, pre action systems, deluge, foam enhanced systems, water mist, dry / wet risers, hydrants and hose reel systems.

Installation works are carried out by fully trained engineers who have many years experience and wide ranging knowledge of all aspects of the fire protection industry. All of our products are fully approved to the relevant standards and are sourced from major nationwide suppliers so ensuring a minimum lead time for any works to be undertaken.

FIRE SUPPRESSION

Our experts has been at the forefront of innovative solutions to our customer's fire suppression systems need.

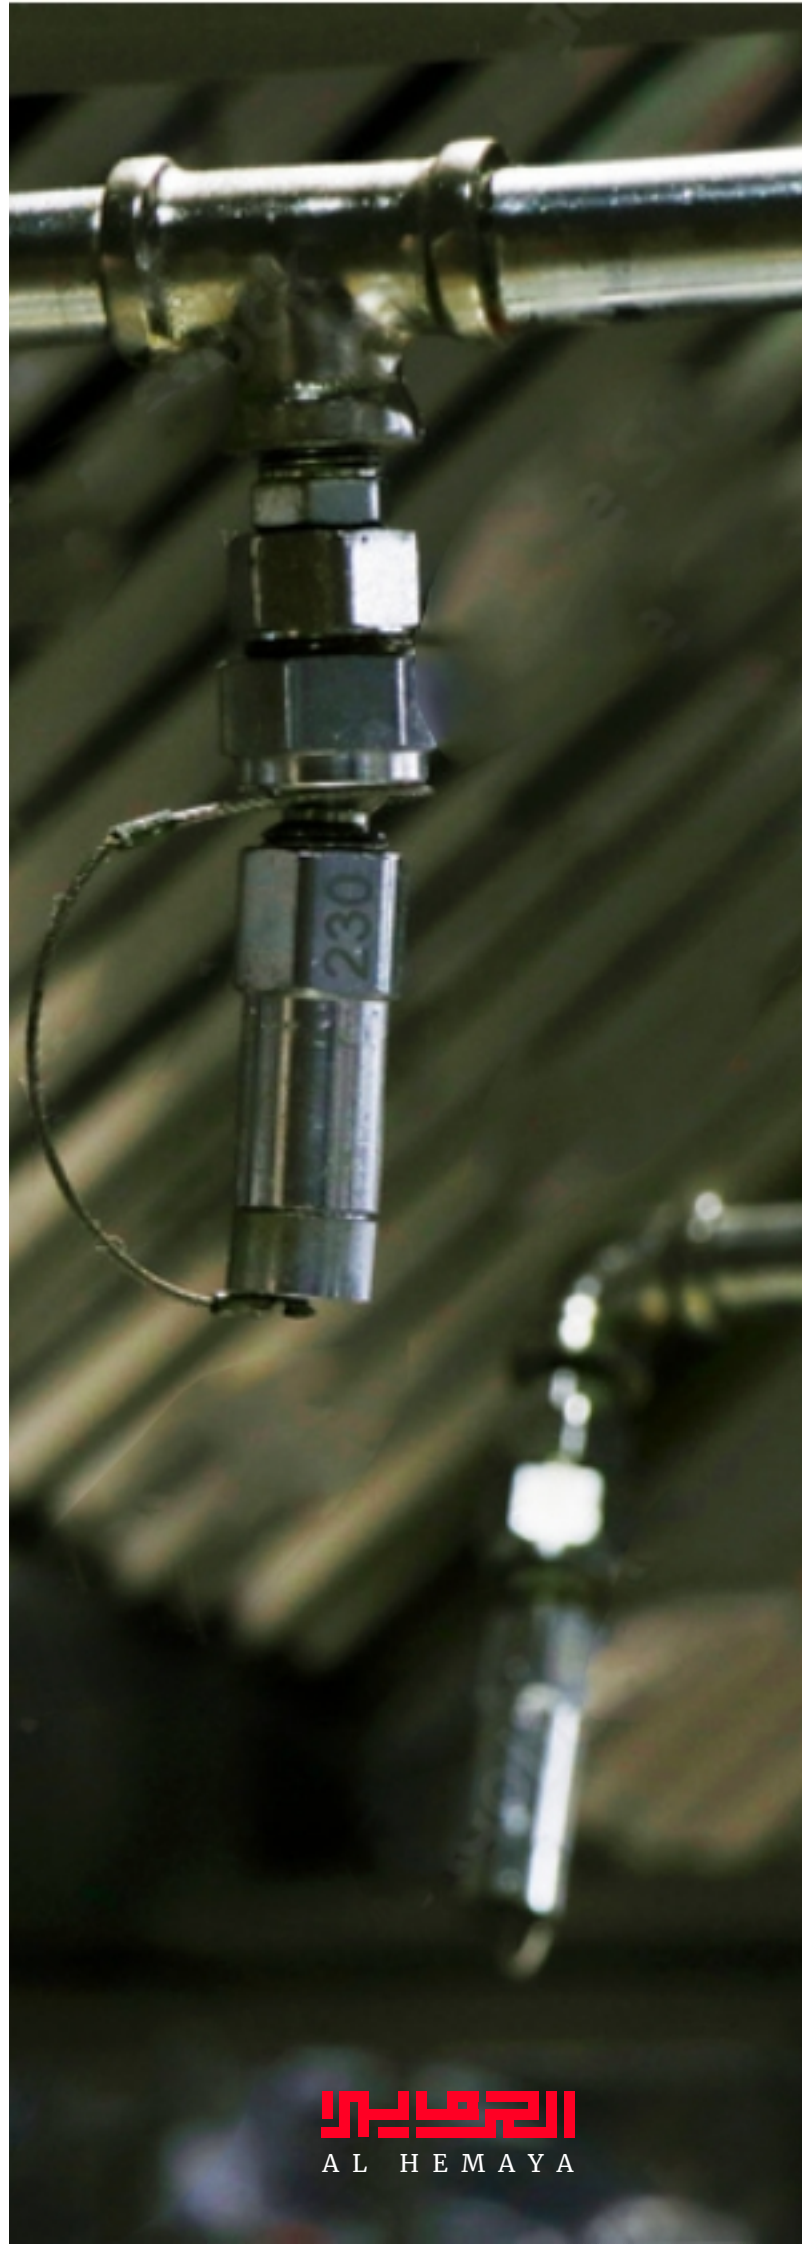

Fire Suppression System

Our fire suppression systems can signal, detect and control a fire. Al-hemays's suppression systems will be tailored to your property using the suppression agent such as FM200, Novec, Co2 and Inergen.

FM200 has been adopted by the majority of the world's fire protection companies and it is the most widely used clean fire agent fire suppressant.

Novec 1230 puts fire out quickly before they can do any serious damage. It is effective on a wide range of class A, B and electrical fires. It offers a safety margin of up to 100% – that's higher than any other type of clean agent fire suppressant.

Carbon dioxide extinguishant systems are designed to protect power plants, oil refineries and electronic processes also including remote switch rooms, generators and oil quench tanks.

AL Hemaya Technical services is complies with all local, national and international standards like PACDA & NFPA
